8. A review of the performance of the group, to the extent necessary for a reasonable understanding of the group's business. The review must discuss any significant factors that affected the turnover, costs, and earnings of the group for the current financial period reported on, including (where applicable) seasonal or cyclical factors. It must also discuss any material factors that affected the cash flow, working capital, assets or liabilities of the group during the current financial period reported on turnover

3Q04 vs 3Q03

Group revenue in the third quarter of FY 2004 ("3Q04") increased by 26.5% to S\$9.4m from S\$7.4m in 3Q03. This is mainly due to revenue contribution of S\$2.7m from our new PCB business in China, which helped to cushion a S\$0.9m fall in revenue from the mechanical drilling business.

Group gross profit in 3Q04 fell 17.4% to S\$2.8m from S\$3.4m in 3Q03. Our performance was affected by our Taiwan laser drilling operations as elaborated below. Further, our PCB production volume in Shanghai was still below the breakeven level.

Our IPO prospectus has stated that our Taiwan subsidiary had ceased provision of mechanical drilling services with effect from February 2004 in order to focus on the provision of laser drilling services. Laser drilling services enjoy higher profit margin and will remain a strong strategic focus of the Group. In line with our strategic focus on laser drilling services, orders for 11 new laser drilling machines were made prior to the listing of the Group in September 2004. Revenue contribution from the provision of laser drilling services for 3Q04 was lower than expected (+S\$3m) due to a slowdown in demand for drilling services for mobile phones handsets generally in the Taiwan

and China markets. The slowdown in handset sales during the period had affected our customers who focused on handset PCBs, and that in turn reduced demand for our drilling services. However, we are pleased to see demands for handset laser drilling services improving from October 2004. Despite the slower demand in 3Q04, the Group will continue to focus on provision of laser drilling services as it is confident that it will be a strong revenue leader for the Group in the long term. Our mechanical drilling operation has benefited from the lower operating cost in China and registered a 30%-increase in gross profit to S\$1.2m despite a fall in revenue.

Group pre-tax profit fell 45.8% to S\$1.3m from S\$2.3m in 3Q03. This is mainly attributable to the less than expected performance in laser drilling operation and the start-up costs in PCB manufacturing. Likewise, Group net profit in 3Q04 fell 58.5% to S\$1.1m from S\$2.6m in 3Q03.

9M04 vs 9M03

Group revenue in the first 9 months ("9M04") of 2004 rose 47.6% to S\$28.9m from S\$19.6m in the corresponding period in 2003. This is mainly attributable to the buoyant demand for laser drilling services in the first half of 2004 and the first-time revenue contribution from our new PCB manufacturing operation in Shanghai, PRC.

Group gross profit in 9M04 grew at a slower rate of 28.8% to S\$12m due to less than expected performance of laser drilling operation and start-up loss of the new PCB manufacturing business in 3Q04. Coupled with higher administrative expenses arising from the new PCB manufacturing operation and higher effective tax rate, Group net profit in 9M04 only managed to show a 0.4% improvement to S\$6.4m. The higher effective tax rate was mainly due to the absence of tax credit and lower investment incentive for our Taiwan operation this year.

9. Where a forecast, or a prospect statement, has been previously disclosed to shareholders, any variance between it and the actual results

No forecast or prospect statement was disclosed to shareholders previously as this is the third quarterly announcement made by the Company.

10. A commentary at the date of the announcement of the competitive conditions of the industry in which the group operates and any known factors or events that may affect the group in the next reporting period and the next 12 months

In Taiwan, our laser drilling plant has seen a pick-up in demand from October 2004. In Shanghai, our PCB manufacturing business continues to grow at a healthy momentum and we aim to achieve breakeven by 4Q04. However, demand for our drilling services in Shanghai, PRC remains relatively flat and competition remains keen.

Barring unforeseen circumstances, we expect our operation in 4Q04 to show an improvement over 3Q04.
